Duplin Career Academies

- Agribusiness
- Computer Information Technology
- Health Sciences (focusing on medical assisting)
- Teacher academies

Duplin County Schools, in partnership with James Sprunt Community College, offer students the opportunity to pursue advanced credits through participation in career academies. Career academies are organized as small learning communities combining academic and career technical education courses into career themed curricula. Students enrolling in the academies complete high school graduation requirements while having the opportunity to take community college courses during their junior and senior years of high school. Academy students also have the opportunity to experience job shadowing, mentoring, career development and work-based learning activities while participating in the program. Proper course selections, as well as sustained academic progress, enables students the opportunity to take prescribed community college courses while in high school.

Duplin Career Academies offer the following components:

- Several classes or disciplines offered primarily to academy students
- A team of teachers focused on the mission of the academy program
- Voluntary enrollment by students who wish to focus on their chosen academy course of study
- Opportunities for academy students to engage in elective courses and other school activities
- An opportunity for academy students to complete graduation requirements in four years and take courses for college credit while in high school
