Medication Technician
Classes to Begin Soon!!

Medication technicians are responsible for providing patients with non-injectable prescription medications. Common areas of study include medical terminology, infection control and human anatomy. Most programs consist of both classroom and hands-on experience; programs can usually be completed in three months or less.

These professionals work under the supervision of registered nurses or other medical staff to prepare, distribute and monitor the effects of a patient's medication. Common places of employment include retirement centers and assisted living facilities. This program differs from Medication Aide as it is not necessary to be currently registered and in good standing with the North Carolina Board of Nurse's on the Certified Nurse Assistant Registry.

Become a member of the healthcare team in as little as 5 weeks! After completion of this 40 hour class you will be prepared and ready to take your state certification exam!! It's that simple!!!

The medication Technician class at James Sprunt Community College is on schedule to begin March 1, 2016. Classes will be held on Tuesday and Thursday from 1pm–5pm in the Boyette building room 219 and pre-registration has begun.

Tuition will be $125.00 plus $1.50 for student fee for a total of $126.50. Please be prepared to pay this amount when pre-registering. There is no text required for this class. The instructor will provide needed materials. Introduction to Healthcare/CRC was/is not a requirement for this particular class. This is a certificate program and upon successful completion the student will be prepared and eligible to take a state certification exam. We look forward to seeing you begin this new step in your career. If you have any questions please call or email me using the information below.
