EMT
(Emergency Medical Technician)

EMTs provide emergency care to sick and injured patients, and provide transportation via ambulance to medical facilities such as hospital emergency rooms. EMTs must assess their patients to determine the type of medical or traumatic emergency that is present, perform interventions such as medication and oxygen administration, splinting, hemorrhage control, CPR and rescue breathing, as well as operate ambulances in both routine (normal) mode and emergency (lights & sirens) mode.

Fees:
- Registration: $180 (unless fee-exempt)
- Malpractice Insurance: $50
- Liability Insurance: $1.50
